

Create A Cloud Object Storage Service

Create a cloud object storage service, create a bucket to store the images, and configure the bucket settings.

The screenshot displays the IBM Cloud console interface for a Cloud Object Storage service. The left sidebar contains navigation links: Getting started, Buckets, Integrations, Endpoints, Service credentials (selected), Connections, Usage details, and Plan. The main content area is titled 'Cloud Object Storage-sk' and shows 'Service credentials'. A table lists a single credential named 'Service credentials-1' created on 2021-04-05 11:32 AM. The credential details are shown in a JSON format:
