

## CreateNode-REDSERVICE

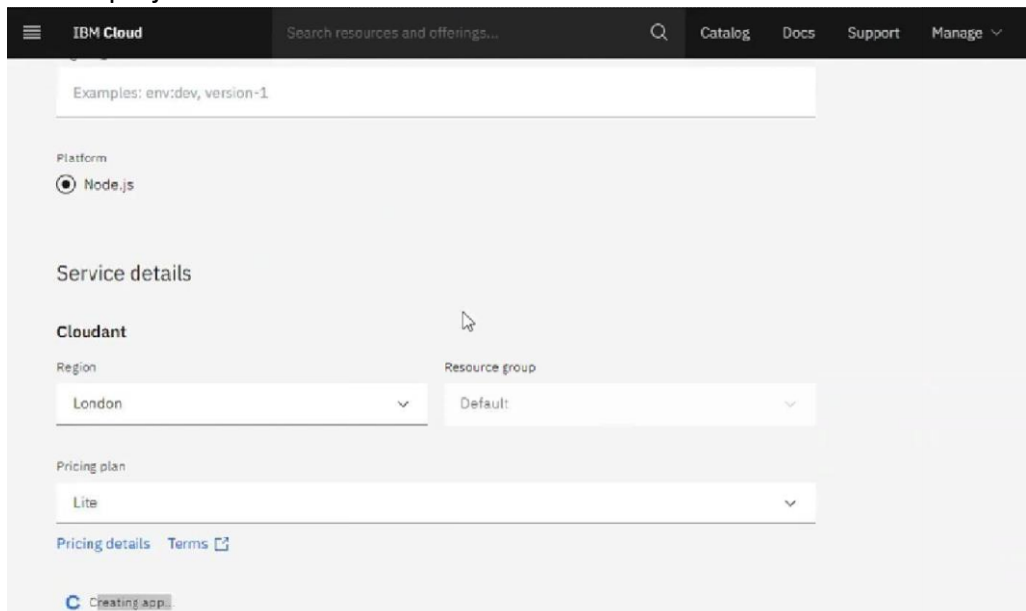

Date	16 November2022
TeamID	PNT2022TMID23634
ProjectName	Project-IOTbasedsmart Cropsprotectionsystem.

1.To create a web application create a Node-RED service.Steps:

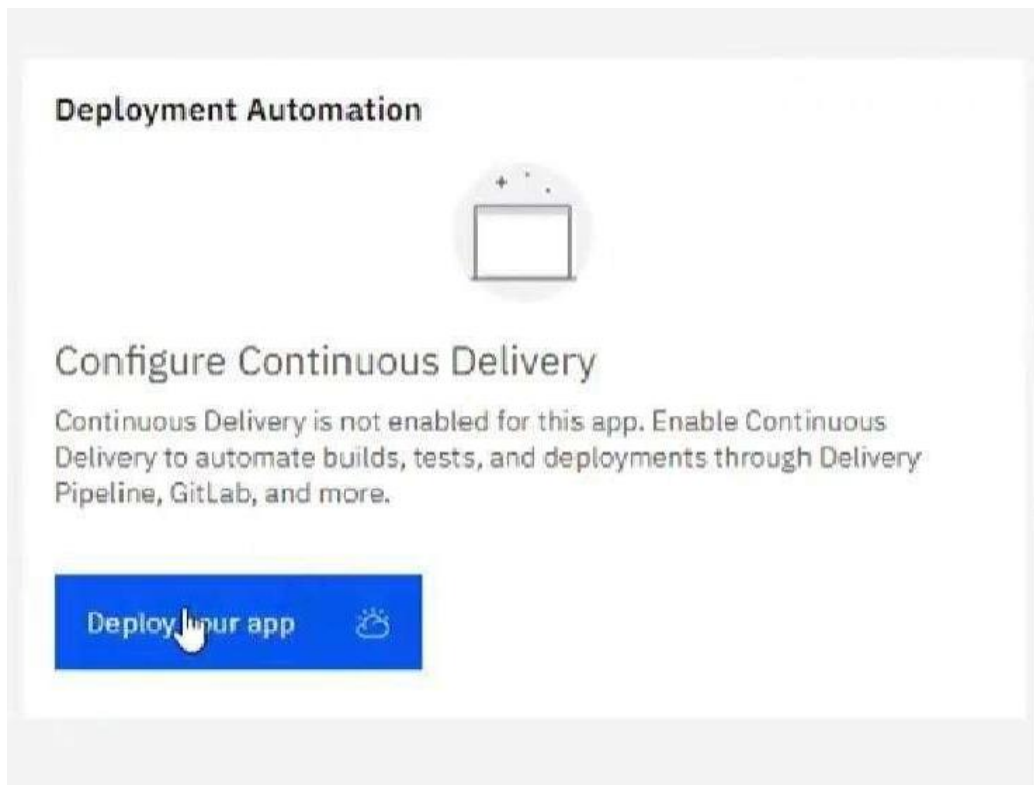

1. Navigated to the App creation page

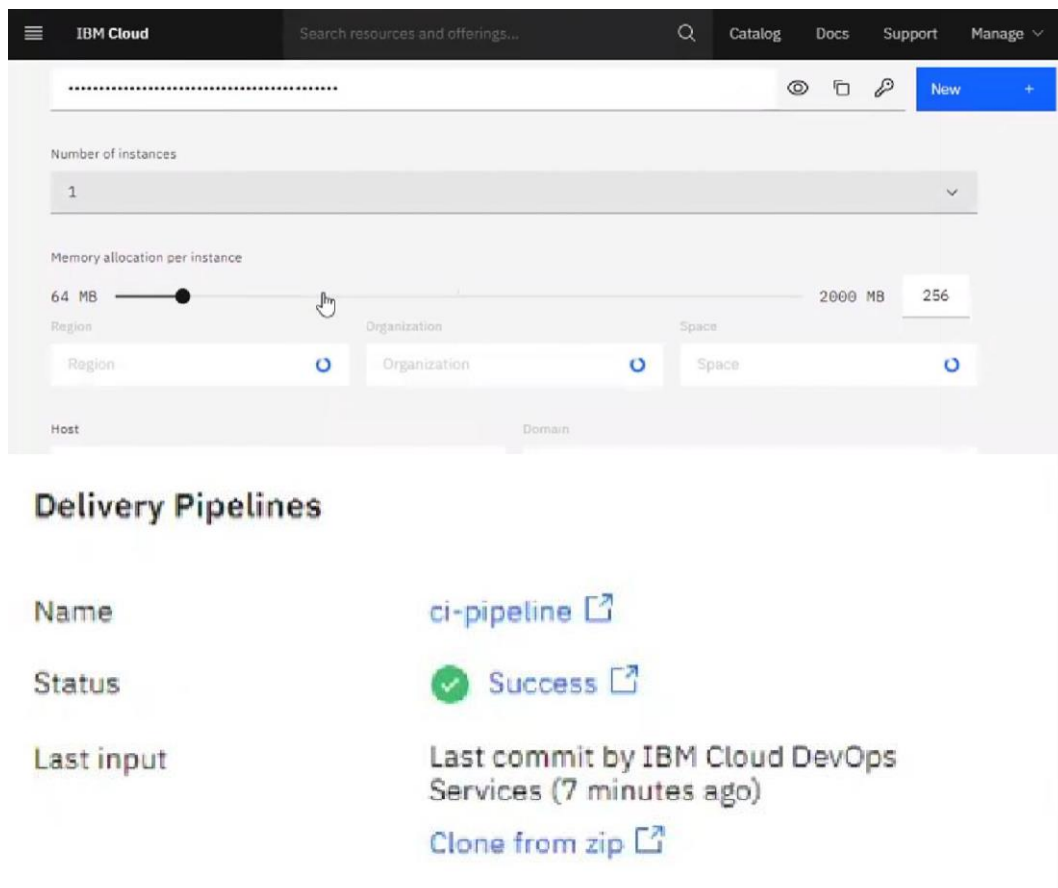

2. Enter project details and click on create

3. Click on the "Deploy your App" Button

#### 4. Setup the environment and deploy the app

## 5. Instanceeditorandsetupcredentials

### Welcome to your new Node-RED instance on IBM Cloud

We know you're eager to start wiring up your flows, but first there are a couple of tasks you should do:

- Secure your Node-RED editor
- Learn how to install additional nodes

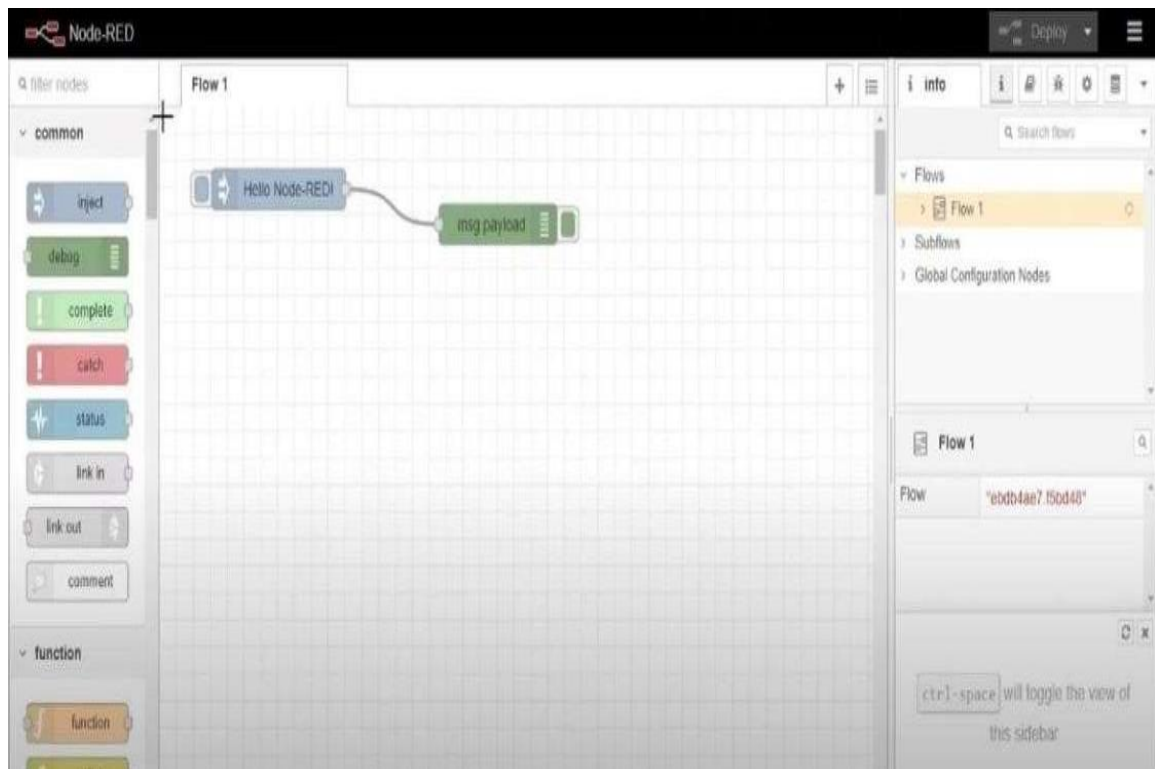

☐ Secure your editor so only authorised users can access it

☒ *Not recommended:* Allow anyone to access the editor and make changes

Your editor will not be secured. Anyone with the URL will be able to access your flows, data and bound services.

☒ Tick this box to confirm you want your editor to be insecure

## 6. Draganddropcomponentsintotheeditor

## 7. deployedtheapp

## CONCLUSION:

Created a NodeRED service on IBM Cloud Successfully
